Fiber Optic Splice Closure (FOSC-400)

1. PRODUCT DESCRIPTION

The FOSC 400 products are butt-type closures used in the outside plant network when mass splice storage is the main requirement.

They are available in three different sizes and are typically used as track joints.

The FOSC-400 closures are made of a thermoplastic material.

- The base and dome are sealed with a clamp and an O-ring system.
- The base has one oval entry port for looped (uncut) cable and, depending on the closure size, 2, 4 or 5 round ports for single cable exit.
- The cable seals are manufactured from heat-shrinkable material.

Depending on the closure size, the splice storage and organizer trays can accommodate from 8 to 72 splices.

All splicing trays are hinged at one end so that any fiber can be accessed without:

- disturbing fiber on other trays,
- kinking buffer tubes, or
- introducing losses.

All cable termination and sealing functions are provided with the closures.

Uncut loose buffer tube storage is provided in optional storage baskets.

2. ORDERING INFORMATION

2.1 CLOSURE ALTERNATIVES

The FOSC-400 closure is available in 3 different sizes. Different configurations are possible, depending upon the application. Section 3 gives full product descriptions.

- i. An “A” closure can initially be fitted with 3 trays, unless splice holder modules are used when only 2 can be fitted.
- ii. A “B” closure can initially be fitted with 6 trays, however, retrofitting a standard “B” closure (delivered with 4 trays or fewer) with a 5th and 6th tray is not possible. If 5 or 6 trays are required, a storage basket cannot be used.
- iii. If 7 or 8 trays are required, a storage basket cannot be used.

- An 'A' closure can initially be fitted with 3 trays (if the tray type is not the one with splice holder modules, there the limit is 2 trays).
- A 'B' closure can initially be fitted with 6 trays. The loose tube storage capacity is very limited in this case (a few tubes can be stored in a plastic bag, consult the local sales engineer for more information). Adding to an installed standard 'B' closure a 5th and 6th tray is impossible.
