- Compatible with various graphics cards including AMD Eyefinity, NVIDIA Surround and Intel Collage
- 2 year warranty

The Lindy mDP to 2 Port HDMI MST Hub is an ideal solution for expanding or duplicating Mini DisplayPort signals across 2 HDMI monitors or TVs. MST hubs allow for the connection of a single mDP source device including computers, laptops or notebooks to 2 separate HDMI displays, while also providing the ability to visualise content in multiple ways. Signals can be expanded across both displays to show large scale spreadsheets, create immersive panoramic gaming experiences or eye-catching digital signage in retail. Content can also be, independently shown on either display, great for developing a productive, multi-tasking working environment, or duplicated on both displays for use in hospitality, retail or educational scenarios.

With support up to 2 x 3840x2160@30Hz 4:4:4 8bit, content can be viewed in ultra-realistic quality, ideal for applications that require a high resolution output such as graphic design, while compatibility with a variety of graphics cards including AMD Eyefinity, ensures issue free multi-screen playback.

This active MST Hub supports DP++ and does not require the source or graphics card to support DP++ to provide dual-mode signals

Please note: This hub is not compatible with Apple products
