The Lindy DST- Mx Duo is a premium solution for connecting your laptop or MacBook (including M1, M2 & M2) to a range of peripherals. Part of Lindy's expert range of Laptop Docking Stations, this product has been designed with Mac users in mind. Maximising the productivity of any creative by providing extended screen real estate with Ultra HD quality as well as SuperSpeed data transfer for all your USB peripherals. Housed in a robust aluminium body, this docking station is reliable and compact, perfect for travel.

Extended Displays

Unlike other docking stations, the DST-Mx Duo can support two external displays at 4k resolution with your MacBook. This is thanks to the docks support for MST (Multi Stream Transport) for Mac. There are two HDMI ports, one with 60Hz capability and the other with 30Hz. Simply plug in your HDMI displays and the docking station will provide Ultra HD resolution through a single USB-C connection.

Versatile

Providing all the ports you will need for a productive workflow; this docking station uses a single USB 3.2 Type C cable to connect up to two 4k HDMI displays whilst providing Gigabit Ethernet connection, Superspeed 5Gbps USB Type A ports and a 3.5mm combined headphone jack.

Pass-through Charging

Thanks to the integrated PD 3.0 port, you can plug your USB-C charger into the docking station and experience up to 100W pass-through charging (depending on the charger's capabilities). This allows you to charge your device whilst working without having to use up any more ports, meaning there is more connectivity potential for other peripherals and accessories.

Easy-to-Use

A software needs to be installed for this docking station. Download it straight from the product page, connect the docking station, to your device and you are good to go.
